

## **CHI-LLC Selects Visual Technology Services PDF3D® Solution for Use with Herman Miller's Z-Axis™ 3D Software.**

Software for space planning configuration of office furniture to be enhanced with PDF3D®.

**Seattle, WA – August 17, 2010** – CHI-LLC is proud to announce a partnership with UK-based Visual Technology Services, a 3D visualization and technical publishing company, to incorporate PDF3D® technology into Herman Miller's Z-Axis™ 3D configuration and visualization software for salespeople and designers in the office furniture industry.

The Z-Axis™ 3D design application immerses clients in stunning 3D visuals for managing their office furniture space plans with ease, and has a sophisticated yet simple-to-use interface. Incorporating PDF3D® technology will further improve how designers and salespeople work with their customers and will open new avenues for sharing and collaborating on projects.

"We are excited at this new partnership and look forward to rolling out this technology to Herman Miller and its dealers," said Dr. Uli Chi, CEO of CHI-LLC. "Giving customers the ability to view and manipulate their spaces using a common software platform like Adobe® Reader gives them versatility and an ease-of-use unparalleled in 3D design software history. Bringing 3D PDF technology to space planning and configuration applications will revolutionize how salespeople and designers interact with their clients and how they work together on projects."

"We are delighted with the new active technology partnership with CHI-LLC, using the functionality of PDF3D to enhance their product with richly interactive PDFs" comments Ian Currington, CEO of Visual Technology Services. "Our cutting-edge technology will really bring the designs of Z-Axis clients to life. We anticipate a long-term partnership in light of the growing authority of PDF3D on the world computer graphics stage."
